

Coordinator – Adding an AGCO Connection

General

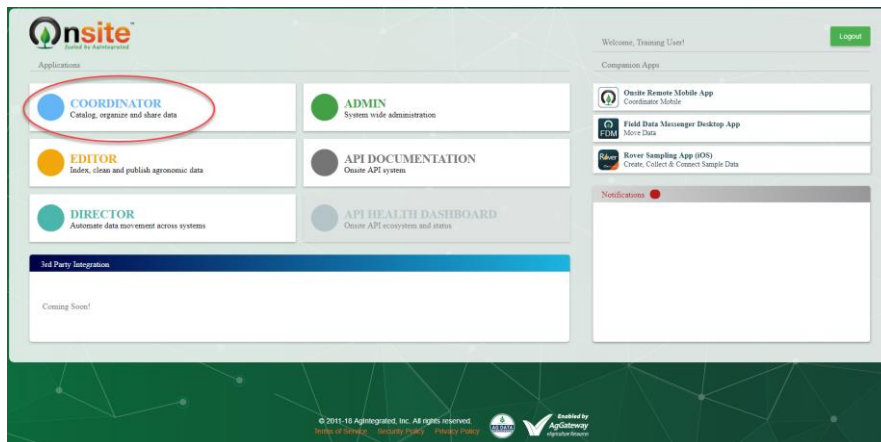

Before files can be sent to and from an AGCO controller, a connection must be established in the QC Pro Coordinator. For this type of connection, one only needs the Username and Password for the AGCO VarioDoc machine. After a connection is established, one can use the Coordinator to send and/or extract any files from the controller remotely, or even use the QC Pro Director to automatically retrieve all new As-Applied files.

Quick Guide to AGCO VarioDoc Connection Setup

1. Navigate to the QC Pro Dashboard <https://qcpro.onsiteag.com/dashboard/>
2. Launch the Coordinator from the Dashboard
3. Select the Connections Tab
4. Choose the My Equipment section
5. Click Add
6. Choose AGCO VarioDoc from the Equipment Type Dropdown, and provide the following details:
 - a. Username
 - b. Password
7. Click Add

Detailed Walkthrough with Screenshots

1. Navigate to the QC Pro Dashboard <https://qcpro.onsiteag.com/dashboard/>
2. After you sign in, launch the Coordinator:

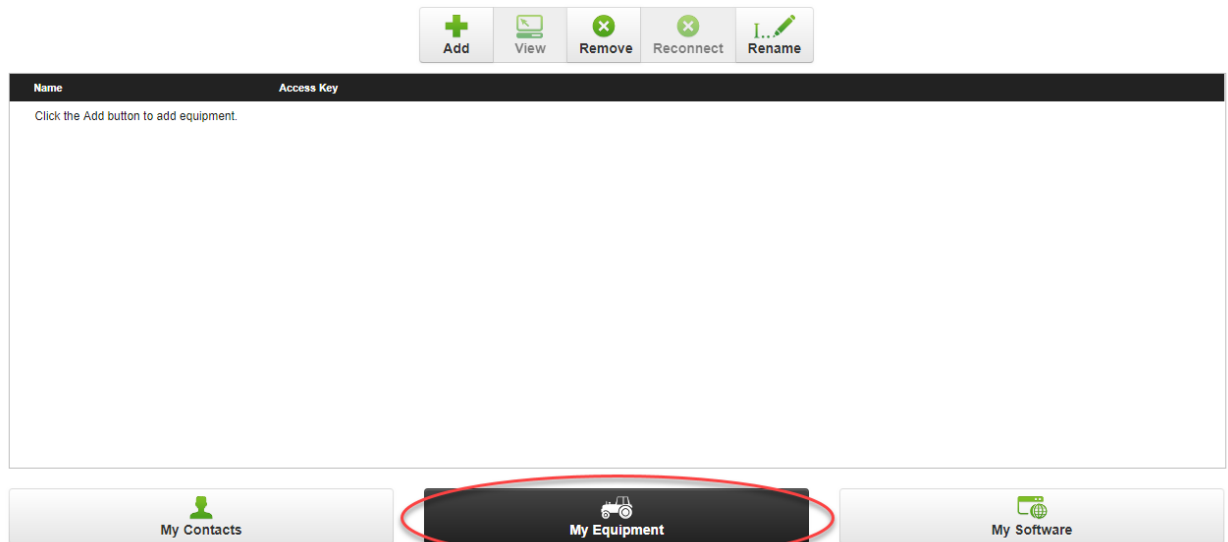

3. Select the Connections tab

Coordinator – Adding an AGCO Connection

4. Choose the My Equipment Section

5. Click Add

6. Choose AGCO VarioDoc from the Equipment Type Dropdown, and provide the details requested

The 'Add connection:' dialog box has a close button (X) in the top right corner. It contains three fields: 'Equipment Type:' with a dropdown menu showing 'AGCO VarioDoc' (circled in red), 'Username' with a text input field containing 'user@training.com' (circled in red), and 'Password' with a text input field containing '*****' (circled in red). At the bottom right, there are 'Cancel' and 'Add' buttons.

7. Click Add
